

Rental Management for Dynamics SL

DynaRent supports businesses that specialize in equipment rental. With DynaRent you can enter rental orders quickly and easily and keep track of rental equipment at all the times.

FEATURES and BENEFITS

Supports multiple site rental operations, allowing customer service to see equipment availability at different locations.

Optionally allows the rental yard or warehouse to become part of the order flow to record damages or notes when processing returns.

Uses a "one-click" closing function to return, close and bill the entire rental order.

Stores rental activity in the Order Management event log for each order.

Supports multiple invoices and multiple equipment deliveries against a single rental order.

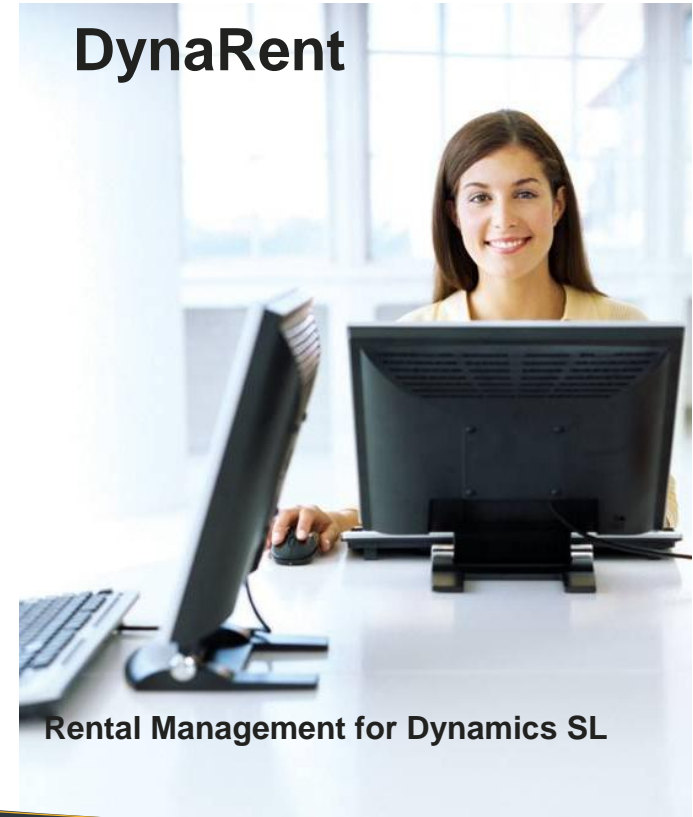

Provides reporting and inquiry of "on rent" and "off rent" equipment and equipment return dates.

Allows serial level control of selected rental items with bar code scanning out and scanning back in.

Uses a recurring billing feature to send invoices out automatically, on schedule.

Supports subrental processing for renting equipment that you first must rent from someone else.
