

Labor Capture for Dynamics SL Projects

The DynaTime Labor Capture module lets you to automatically collect employee labor by project or job. It feeds these hours to the Time and Expense for Projects, automatically calculating overtime.

DynaTime

Labor Capture for Dynamics SL

FEATURES and BENEFITS

Save data entry time and use a scanner for hands-free, real time capture of employee time.

Provide an accurate labor costs, an exact overtime calculation and real clock times worked.

Eliminate key entry errors of time posting to incorrect projects or tasks.

Use Attendance Mode to track time worked for payroll.

Look real time to see who is working on what jobs.

Use DynaTime wireless to remotely capture time from a handheld device.

Round scanned time to five minute increments.

Support multiple sites against a common database, allowing any site to be in a different time zone.

Save time by allowing supervisors to review production labor detail online.

Use real time job labor content to estimate completion dates for the customer.

DynaTime

Labor Capture for Dynamics SL

DynaTime facilitates labor time collection by providing real-time editing of employee, job and task to ensure that each scan is valid. The Interface will start the timer when the employee first scans into a project/task and stops the timer when the employee scans his name again.

The module has features for batching transactions to Time and Expense for Projects for later review, approval, and possible correction. Use the Attendance Mode feature to collect total time for payroll.

| Your Scanned Information | |
|--------------------------|------------------|
| Employee ID | E01210 |
| Name | Monty Freeman |
| Job | EN123000 |
| Work Order | DS00203 |
| Description | Paint Car02 |
| Time of Scan | 08/09/2001 18:09 |

Work Order Stopped...
Start_Time: 08/09/2001 14:30
Stop_Time: 08/09/2001 18:09
Elapsed_Time: 03:39

Capture labor when employees clock in and scan a job. Clock out by scanning their employee badge a second time.

Use a wireless handheld to capture time from the field.

“We have implemented DynaTime in all of our locations across the country. The employees adapted easily and we have realized significant improvements in the efficiency and accuracy of the time collection process.”
